PUEBLO -- We were watching Hardball with Chris Mathews, MSNBC on November 1, 2008 and during Obama's speech about 4:30 PM, which I think was in Pueblo Colorado a UFO can be seen in the sky moving from the upper right to the mid left side of screen above Obama's head.

Comments: The video shows an object without apparent wings flying in the background to the right of Barack Obama. The object appears to be flying too fast to be a blimp. Therefore I am not sure of the identity of this object. Thanks to William Puckett UFOS Northwest
