

March 8, 1990 Interview Henry Victorian and Dr. Walker

Written by Grant Cameron
Thursday, 08 March 1990 06:00 -

Telephone conversation between Henry Azadehdel of Nottingham, England and Dr. Eric Walker, former (1956-1970) President of Penn State Univ.; Chairman Institute for Defense Analysis, and founder and former director of the Navy's Ordnance Research Laboratory. The interview took place March 8, 1990.

Mrs Walker Hello?

Azadehdel Hello. Is Dr. Walker in, please?

Mrs. Walker Yes.

(I waited for a short while)

Dr. Walker Hello?

Azadehdel Hello. Dr. Walker. This is Henry from Nottingham.

Dr. Walker Hello. How are you?

Azadehdel I am fine thank you. Doctor, I have sent you a book earlier this week. I hope you will enjoy reading it. It is called the Open Verdict. It is about 25 scientists who worked in the Ministry of Defense, and all died in mysterious circumstances.

Dr Walker Well I have not received it yet. Have you received my book?

Azadehdel No. Doctor. I sent this book on Tuesday by Air Mail. You should receive it in ten days or so. But, Doctor, I have been reading this book called Above Top Secret. There are some documents there referring to a group known as MJ -12. Have you heard of them?

Dr Walker For a long time now. I have nothing to do with them.

Azadehdel Are the documents authentic?

Dr Walker I don't think so.

Azadehdel Doctor. Is there such a group still active?

Dr Walker How good is your mathematics?

Azadehdel As good as it could be for a doctor in physics, but why?

Dr Walker Because only a couple people are capable of handling this issue. Unless your mind ability is like Einstein's or likewise, I do not think you can achieve anything.

Azadehdel well, Doctor, for years I have been trying. But, are there government scientists?

Dr Walker Everyone mistakes this issue. I gather by that you mean whether they work for the Defense establishments of the military.

Azadehdel Yes, Doctor, that is what I meant.

Dr. Walker Well, that is where you are wrong. They are a Handful Of Elite. When you are invited into that group I would know.

Azadehdel Is it a group like Bilderbergs, Pugwash, or the Trilaterals?

Dr Walker I didn't get that

Azadehdel Is this group like the Bilderbergs, Pugwash, or the Trilaterals?

Dr Walker (Silence for a long while) Something like that.

Azadehdel Are there any members of the public in this group?

Dr Walker What do you mean?

Azadehdel I mean ordinary people who have dedicated their lives to studying UFO?

Dr Walker No.

Azadehdel Are you a member of that group?

Dr Walker I cannot answer that. How good is your sixth sense? How much do you know about ESP?

Thursday, 08 March 1990 06:00 -

Azadehdel I know to some degree about ESP and EVP. But, what has that got to do with it?

Dr Walker Unless you know about it, and how to use it, you would not be taken in. Only a few know about it.

Azadehdel Doctor, are there any military people in that group?

Dr Walker No.

Azadehdel Have we used any derivative of the learnt technology in the military?

Dr Walker I cannot answer that question. You are trying to squeeze answers out of me. If you are invited into this group I would know.

Azadehdel Are the members 10, 12, 14, are they all Americans?

Dr Walker I cannot give you the numbers, and no, not necessarily, they are not all Americans.

Azadehdel Doctor, have we mastered the knowledge? Are we working together with the entities? Dr Walker No. We have learned so much, and no we are not working with them...only contact.

Azadehdel Have we captured any saucers.. any material from the discs to study?

Thursday, 08 March 1990 06:00 -

Dr Walker The technology is far behind what is known in ordinary terms of physics that you take the measure and obtain measurements. You are pushing for answers aren't you?

Azadehdel Doctor, I have obtained a report called Project Magnet. Have you ever met Wilbert Smith who worked on this project in Canada?

Dr Walker No, I don't believe having met this person.

Azadehdel Is the concept on the Electromagnetic or Gravity?

Dr Walker As I said. It is far ahead of the known level of physics. A very few have knowledge of it.

Azadehdel O.K. Doctor. Let us change the subject. What do you usually read?

Dr Walker Well, at the moment, I am reading The Spy Catcher.

Azadehdel You are a little behind, Doctor, in that department, aren't you?

Dr Walker (he laughs) Well, I have not had the time. But it is interesting. I like books like this.

Azadehdel Well, Doctor, in that case you will enjoy my book. I would send you hereafter some books.

Dr Walker Are you familiar with the theory of Relativity? Do you know whether we have used it or not?

Thursday, 08 March 1990 06:00 -

Azadehdel Yes, I am familiar with it. But, whether we have used it, I guess my answer would be yes and no.

Dr Walker That is correct, yes and no.

Azadehdel Doctor, I guess this subject is like chasing the whirlwind. (Henry specifically used this word because of the curious phrase " chasing windmills " used by Walker in the Steinman interview)

Dr Walker Well, yes. But if you capture that whirlwind, what do you want to do with it?

Azadehdel It is a very good and valid question, one which...that sort of analogy from my point of view does not apply to it. I am not going to pass judgment on it, as to whether it is good or bad, and hence I should not follow it up for those reasons. I am a scientist, looking for answers and solutions. I guess like any other scientific problems which I might encounter.

Dr Walker As I said, very few who are not officials have been able to work (with them) and if you are invited into their circle, I would know.

Azadehdel Doctor, thank you very much for your time. We should chat again.

Dr Walker Thank you, yes, we should. Bye.
