In a statement made on May 7th, former State Representative from New Hampshire and State Federal Relations and Veterans Affairs committee member, Henry W. McElroy Jr. went on the record with some startling claims about documents he saw during his tenure.

McElroy claims to have seen documents referring to knowledge of "benevolent" extraterrestrial visitation within the US and the possibility of setting up a meeting with President Eisenhower.

All of these claims are as yet unverified, but make for interesting listening / reading nonetheless. In the words of Nick Pope, "Interesting if True."
