In a fair and just world, if confirmed, the research experiments just conducted by Dr. Diane Powell would be a contender for a Nobel Prize. The key words are of course “fair and just” world.

Dr. Powell is a practicing psychiatrist; John Hopkins trained neuroscientist, a former faculty member at Harvard Medical School, and a contributor to the Institute of Noetic Sciences. She is also the author of the book *The ESP Enigma*.

Dr. Powell’s interest in the area of ESP was sparked in part by one encounter with a female patient in a hospital ward who indicated she was receiving psychic information about Dr. Powell that she should hear it. What the woman said in terms of information was 98% accurate. It was a life altering event for Powell.

The scientific investigation work that Powell has just completed in the field of ESP was described accurately as “data that could mute the great Amazing Randy challenge.” This is a \$1,000,000 challenge for a one-million-dollar prize “to anyone who can show, under proper observing conditions, evid
