

Does the CIA Influence Hollywood On UFOs?

Written by Grant Cameron

Sunday, 15 July 2012 17:35 - Last Updated Sunday, 15 July 2012 20:34

A big question that has been around in the UFO community for many years is the question of whether or not the government has been busy trying to influence the public knowledge and understanding of UFOs.

If true, the CIA is one of the government agencies that may have been involved in this influencing. One of the reports of this possible interaction goes all the way back to 1973 when producer Bob Emenegger reported the presence of a representative of the CIA who was present during the entire production period for the documentary "UFOs, Past, Present, and Future,"

On July 12, radio host George Noory at Coast to Coast AM had former CIA media representative Chase Brandon on his show. Brandon is now attached to the Agency as a contract employee. Noory posed a specific question to Brandon as to whether or not the CIA has tried to influence Hollywood related to UFOs to acclimatize the population to what is really going on. Thanks to the work of Giuliano Marinkovic that link is now available for all to hear.
